

ACADEMIC ADVISING

Academic advising is one of the most important services a student will receive in college. The student and the counselor work together to achieve the student's educational goals.

Tri-C counselors/advisors help students:

- Learn about requirements for Tri-C's degree and certificate programs and help track degree completion using DegreeWorks
- Develop educational goals as they relate to careers
- Are accessible through email, phone, Webex and face-to-face
- Understand the various modalities of course offerings and help students choose the one best suited for them
- Develop complete academic plans through the completion of a program or degree
- Interpret Career Coach and other career assessments
- Explore majors consistent with a student's interests, abilities and goals
- Hold advising sessions at the 25%, 50% and 75% milestones of the student's graduation
- Explore transfer opportunities at area colleges and universities
- Develop course schedules that consider a student's academic background, course prerequisites and educational goals
- Become aware of and interpret academic policies as they relate to a student's situation
- Identify appropriate resource personnel to assist students with study skills, career counseling, financial aid, personal counseling and resolving complaints
- Understand the Ohio Transfer Module, OT-36, Transfer Assurance Guides and Transferology as tools to aid with transfer planning

E-Advising

Students are encouraged to use E-Advising to learn more about programs, degrees, certificates and transfer options. Use the form on the E-Advising web page to speak with a counselor online or via email or phone.

E-Advising is conducted through chat and Webex in real time
