ZLDA-1017 Supply Chain, Logistics Technology and Warehouse Program 9.6 CEUs

The purpose of the Certified Logistics Technician program (CLT) is to recognize through certification individuals who demonstrate mastery of the core competencies of material handling at the front-line level (entry-level through front-line supervisor) through successful completion of the certification assessments. The goal of the CLT certification program is to raise the level of performance of material handling and distribution workers both to assist the individuals in finding higher-wage jobs and to help employers ensure their workforce increases the company's productivity and competitiveness. The CLT program consists of two parts: the foundational-level Certified Logistics Associate (CLA) Certificate and the mid-level technical CLT Certification. Before sitting for the CLT assessment, candidates must have a CLA Certificate (MSSC, 2018). MSSC Course Materials The MSSC CLT is delivered in a blended learning format. The course outline was developed in accordance with MSSC CLT training standards and materials, which includes:

- The framework for Certified Logistics Technician: CLT Critical Work Functions Covered by MSSC Courses and Assessments: Page 3
- Instructor Authorization Training Designing & Managing the CLT Learning Environment manual
- Supply Chain Logistics: Foundational Knowledge for Frontline Workers student textbook
- Supply Chain Logistics: Mid-level Technical Knowledge for Frontline Workers student textbook
- OpusWorks E-Learning Portal (PDF textbooks, pre, and post-tests, practice exams, optional presentation, videos, and classroom exercises and sharing of materials)
