COMPREHENSIVE PROFESSIONAL MEDICAL CODING (CLASSROOM)

Program description

Certified professional coders (CPCs) are an important component of the medical billing process and health care teams. When a patient receives care in a physician's practice, hospital outpatient facility or ambulatory surgical center, the provider must document what services were performed. CPCs review clinical statements and assign standard codes using CPT®, ICD-10-CM and HCPCS Level II classification systems so medical claims can be submitted for reimbursement.

Tri-C's **Comprehensive Professional Medical Coding** program utilizes the American Academy of Professional Coders (AAPC) curriculum for medical coding. The 24-week program includes medical terminology, anatomy and physiology, CPT coding, ICD-10 coding and HCPCS coding. Each course is required for program completion. Evening and weekend class options may be available.

Other important information

- The classroom program costs $5,600.
- Face-to-face classes are taught by well-trained and highly recommended AAPC-certified instructors.
- A high school or GED diploma is required.
- Integrated career and job readiness (professionalism) is provided.
- A CPC mock exam/review session is required.
- AAPC test results are required to be released
- The CPC online practice exams are available following exam registration.
- The private CPC exam is offered on-site with class peers.

Contact 216-987-3171 or 216-987-2925 for further details.

Program cost

Visit the Health Industry Solutions' website for pricing.

The cost includes all text materials for each course, the CPC Exam Voucher and an AAPC Annual Membership.

The CPC National Exam Voucher and AAPC annual Student Membership are available upon program completion and financial clearance.
