

# NUCLEAR MEDICINE, ASSOCIATE OF APPLIED SCIENCE

A Nuclear Medicine technologist is the health professional responsible for performing nuclear medicine examinations that assist the physician in the diagnosis and treatment of various diseases. The trained nuclear medicine technologist prepares and administers radiopharmaceuticals and performs patient imaging procedures using radiation detection devices. Technologists provide data analysis and patient information to the physician. The nuclear medicine technologist may be employed in hospitals, clinics, imaging centers, physician's offices, education, research and manufacturing. Graduates of the program may be eligible for the American Registry of Radiologic Technologists (ARRT) examination for Nuclear Medicine and/or the Nuclear Medicine Technology Certification Board examination (NMTCB). The program is accredited by the Joint Review Committee on Educational programs in Nuclear Medicine Technology.

## Other Information

- A 2.50 prerequisite GPA must be maintained while waiting for entry into the first program major course. After admission to the program, a 2.75 overall GPA or higher must be maintained.
- Up to 19 students can be admitted - varies depending on space available at clinical facilities.
- Certification in the Basic Life Support (CPR) course for Health Care Providers (adult, child, and infant) according to the American Heart Association standards will be required prior to receiving clinical assignment the second year of the program. Training is offered on campus during the second semester.
- Candidates will be required to present evidence of good health verified by a physical examination prior to entering clinical training the second year of the program. Please refer to Health Requirements for Western Campus Health Career Students.
- One admission requirement course may be repeated one time to improve a grade below 2.5 gpa. A "W" is counted as an attempt.
- All students enrolled in Health Career and Nursing programs requiring off campus clinical experiences are required to complete a background check that includes fingerprinting and a court search. Log onto <http://www.tri-c.edu/programs/health-careers/background-check-information-bci.html> for further information. Please be assured that this information will be kept confidential.
- After Program Acceptance: Details will be provided at Orientation prior to the start of the program on when to complete HAZMAT, CPR, immunizations and physical exams.

## Program Learning Outcomes

This program is designed to prepare students to demonstrate the following learning outcomes:

1. Communication: Use effective verbal, non-verbal and written communication skills to provide comprehensive patient care in a healthcare team environment.
2. Safety: Prepare, record, administer and dispose of radioactive materials according to regulatory guidelines to ensure safety of patients, co-workers and the general public.
3. Patient Care: Demonstrate comprehensive patient care skills to provide safe, efficient and high quality nuclear medicine services.
4. Technical Skills: Apply general science knowledge to demonstrate the proper and safe use of equipment and instrumentation for diagnostic and therapeutic applications within the scope of nuclear medicine practice.
5. Eligibility for Professional Certification: Sit for Nuclear Medicine Technology Certification Board (NMTCB) and/or American Registry of Radiologic Technology [N] (ARRT) and apply for state licensure as required by individual state law.

MATH-1140, MATH-1141, MATH-1200, MATH-1270, and MATH-1280 can no longer count towards fulfilling the college-level mathematics requirement. These courses were re-classified as developmental mathematics by the state of Ohio in 2016. Tri-C established a 5-year transitioning window for students who had completed these courses prior to 2016 to apply them towards meeting graduation requirements, which expired in Summer 2021. It is highly recommended to see a counselor to determine the appropriate math required for your current major.
