

# STATE TESTED NURSING ASSISTANT TRAINING

## Program Description

State Tested Nursing Assistants (STNAs) play a critical role within the health care industry. As members of the health care team, STNAs have the most direct contact with patients. STNAs work in a variety of settings, such as rehabilitation centers, hospitals, residential care facilities, clinics, day care centers, assisted living facilities or in a patient's home. STNAs improve their patients' well-being by assisting them with personal care and monitoring progress with their recovery goals. They work as care partners, patient care assistants, caregivers, clinical assistants, home health aides, resident assistants and more.

## Program Features

- Integrated career and job readiness curriculum
- CPR
- Clinical hours
- State exam preparation
- Mandatory skills review session prior to state test
- On-site state testing (first attempt included in program cost)
