

# SUPPLY CHAIN, LOGISTICS TECHNOLOGY AND WAREHOUSE PROGRAM

## Program description

The Supply Chain, Logistics Technology and Warehouse program at Cuyahoga Community College (Tri-C®) recognizes individuals who demonstrate mastery of the core competencies of material handling at the frontline (supervision). This program assists logistics workers in finding higher-wage jobs and helps employers ensure their workers are capable of increasing the company's productivity and competitiveness.

The Supply Chain, Logistics Technology and Warehouse lab curriculum gives students the opportunity to learn in a practical application environment. During hands-on warehouse activities, students directly and safely simulate roles and responsibilities while using warehouse equipment and technology.

## Features

- Training takes place in a simulated warehouse lab.
- Students learn through hands-on, practical training on industry-standard equipment.
- Training can be completed in 10 weeks.
- The curriculum includes OSHA 10 certification and tow motor training.
- The starting hourly rate for certified logistics associates/technicians is as high as \$16.06 (Source: Occupational Wage Survey)
